**Use Case: Adding Knowledge**

Medical Association

Tammy is the CEO of the "Heart Health Association", which leads the development of several predictive analytics and heart care toolkits. Thanks to Knowledge Grid, it has been easy to create, manage, and update a collection of digital knowledge objects that carry their most recent findings in computer-processable form. This makes it convenient to share their knowledge, understand how it is used in the real world, and generate new revenue.

Activate Knowledge for Health

Convert study findings into coded forms and compute useful advice from any health data.

Users Can Do Three Things

Add

Take actionable knowledge, make it machine-ready, and manage it...

Read the story

Activate

Deploy the "added" knowledge to generate health advice...

Read the story

Benefit

Apply the health advice to real-world decisions for better outcomes...

Read the story

Stakeholders Are Many & Diverse

Those Who Add

Researchers
Publishers
Medical Association
Tech firms
Quality Improvement

Those Who Activate

Hospitals
Health IT
Tech firms
Health Insurers
Government

Those Who Benefit

Providers
Hospitals
Consumers
Health Insurers
Public Health

Tools

Platform

Ecosystem of three tools allowing users to convert study findings into coded forms producing advice from any health data.

Learn More

Object Activators

Systems for deploying Knowledge Objects to process health data. **Learn More**

Knowledge Objects

Modularized, externalized computer-processable knowledge. **Learn More**

Object Library

Digital repository for storing and managing Knowledge Objects. **Learn More**

Read about how it works.

Authoring Knowledge Objects   **Using Knowledge Objects**
